## EDUCATION

### Bachelor of software engineering,

Addis Ababa Science And Technology University

09/2021 – 07/2026  
Addis Ababa, Ethiopia

### Competitive Programming and Coding Academy

African to Silican Valley | A2SV -Backed by Google

11/2023 – 10/2025  
Addis Ababa, Ethiopia

- A nonprofit organization that empowers high-potential university students in Africa to achieve their tech career goals. It is also backed by Google.
- A2SV placed 50+ students at top-tech companies such as Google, Bloomberg, Databricks, Amazon, LinkedIn, and Square in the last four years.

### Relevant Courses:

- Internet Programming, Database Systems, Object-Oriented Programming, Operating Systems, Data Structures, and Algorithms.

## PROFESSIONAL EXPERIENCE

### Software Engineer Intern,

Eskalate

07/2024 – 09/2024  
Addis Ababa, Ethiopia

- Spearheaded a team of 5 web developers, accelerating project delivery by 20% through the adoption of Next.js, RTK Query, and Tailwind CSS.
- Audited and optimized over 5000 lines of code, enhancing adherence to industry standards, which resulted in a 15% reduction in post-deployment issues.
- Collaborated with a teammate to integrate Redux, elevating content visibility by 25% through improved UI development.

## PROJECTS

### GreeNet Web Platform – React.js | Django | MongoDB | Edge-Ready Architecture

- Created a cloud-integrated real-time web app for Ethiopia's agriculture sector.
- Optimized Django APIs for faster data access and supported future cloud deployment.
- Improved performance by 25%, and independently built features with minimal oversight.
- Integrated **Supabase Auth** and storage with real-time data updates.

### BankDash Platform – Next.js | TypeScript | Redux | Vercel

- Built a secure online banking platform within 1 month using agile methodology.
- Implemented authentication, dashboards, and transaction systems.
- Deployed cloud-ready features and used Redux for optimized state management.

## ACHIEVEMENTS

### A2SV Hackathon Semi-Finalist (Top 8)

- Acknowledged for exceptional innovation as part of a 5-member team.
- Secured a top 8 position for creating the GreeNet web platform, a real-time data tool benefiting traders, farmers, and government officials in Ethiopia.

### Competitive Programming

- Solved over 600+ algorithmic problems on platforms like LeetCode and Codeforces, covering topics such as linked lists, stacks, dp, and graphs.

## SKILLS

### Languages & Tools:

Python, Django, C++, JavaScript, TypeScript, PHP, MySQL, MongoDB, Redux, Tailwind CSS, Git, Linux

### Frameworks & Libraries:

React.js, Next.js, RTK Query, Node.js, Django

### Backend & Cloud:

Supabase (Auth, Realtime, Edge Functions), PostgreSQL, Firebase, Render, Netlify
